Subject: ReThink Disposables + The Bay Foundation partnership - follow up
RD- Prospective LA County Cities.xlsx

Hi Samantha and co!

We promised you a list of potential cities in Los Angeles County for a future ReThink Disposables campaign, with support from The Bay Foundation.

Attached is an Excel of potential cities, a collaborative multi-city sustainability group, and an university for which we have ties and existing partnerships. The sheet has details for obvious barriers and other notes. Three very different scenarios, but all significant in their own ways.

As I mentioned over the phone, we've tentatively included a Single Use Disposables Reduction Initiative as a task in our 2018 Work Plan - to be approved by our board. This is significant because an inclusion in our work plan prioritizes the work and gives us permission to put time into such projects, including a search for funding. Otherwise, we'd have to work on this after hours.

We are keeping our eyes open for funding opportunities. Excited about making a bigger impact in solidarity. Let me know if you have any questions.

Have a great day!

Grace Lee
Director of Outreach Programs
